shario

Make room for more.

Bookings, memberships and websites for shared spaces.

shario.io

Shared space.
Shared possibility.

Clear enough to feel familiar.
Bright enough to feel full of possibility.

shario

Capable

Clear tools for the people running the space.

Welcoming

Show the people, ideas and activities that belong here.

Adaptable

A recognizable platform with room for each customer.

Blue

Aqua

Coral

Sunshine

Lilac

White is the main canvas. Blue identifies Shario. Supporting colors bring energy to people, stories and campaign artwork.

For the people who make spaces work.

OUR PROMISE

Easier to run.
Easier to join.

For operators of shared spaces, Shario brings bookings, memberships and a customizable website into one product, with a clear experience for the people who use it.

Operator-first

01 Keep the essentials together.

Connect the public experience with the work of running a space.

02 Make participation clear.

Show what is available, what it costs and what happens next.

03 Let each space be itself.

Give operators room to express their own name, style and community.

Example audiences: coworking, creative studios, workshops, rehearsal spaces and community venues. Specific workflows require product validation.

One platform. Many identities.

WRITE IT LIKE THIS

Shario

Product name in prose

shario.io

Domain in lowercase. No spaces.

Suggested pronunciation: SHAIR-ee-oh.
The logo remains lowercase: shario.
Use .io for a web address, not every mention.

Shario leads

Corporate website, admin product and product communication.

The space leads

Customer websites, booking pages and venue messages.

A quiet endorsement

Optional “Powered by Shario” in a footer, where product settings permit.

Shario is a standalone brand. The Skab code origin does not need to become a public sub-brand or co-branded logo.

An open invitation.

Two parts. One S.

The opposing forms suggest rooms connected by a shared passage.

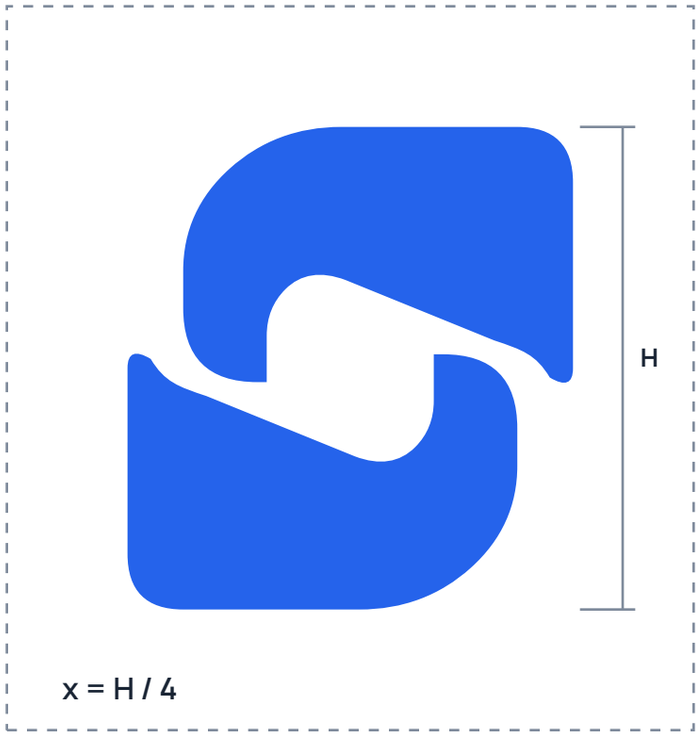

Soft, structured, clear.

Rounded geometry feels approachable while the solid silhouette stays practical.

A name you can read.

The lowercase wordmark balances warmth with everyday legibility.

Give the identity room.

Clear space

Keep at least x around all sides of the visible logo, where x is one quarter of the symbol height. Keep text, edges and other marks outside this area.

The supplied SVG artboards include this margin.
Scale every element together; use the master artwork.

Construction is fixed in the SVG paths. Do not rebuild the mark from a font, circles, strokes or a screenshot.

A recognizable core in every setting.

Primary / blue symbol + ink wordmark

Reverse / white on blue

One-color / blue

One-color / ink

Minimum sizes Lockup width: 120 px / 25 mm · Domain width: 160 px / 34 mm · Symbol height: 24 px / 6 mm

Widths include padding; symbol height measures the visible mark. Use supplied favicon files at 16, 32 and 48 px. A black production master is included.

From a tab icon to a sign.

shario

Stacked

For square or centered layouts.
Minimum 96 px / 22 mm wide.

shario.io

Domain signature

Use when the destination matters: offline materials, partner listings and direct website promotion.

App icon and symbol

Use the symbol after brand recognition is established.
Use the supplied favicon for 16, 32 and 48 px.

Minimum widths include the supplied artwork padding. Preserve the built-in clear space; do not crop the logo artboard to make it appear larger.

Keep the form consistent.

Keep the proportions

Never stretch or compress the artwork.

Keep the orientation

Never rotate the logo to fit a layout.

Keep it visible

Avoid low contrast and busy image backgrounds.

Keep the master intact

No shadows, outlines or extra shapes inside the symbol.

White space. A clear blue signature.

Blue

#2563EB

RGB 37 / 99 / 235

CMYK 84 / 58 / 0 / 8

Logo symbol, primary actions and links.

Ink

#182333

RGB 24 / 35 / 51

CMYK 53 / 31 / 0 / 80

Wordmark, headlines and body text.

White

#FFFFFF

RGB 255 / 255 / 255

CMYK 0 / 0 / 0 / 0

The main canvas for the brand and product.

HEX is the digital source of truth. CMYK values are unprofiled approximations; proof against the chosen stock and output profile.

A little color opens things up.

Aqua

#4DD7C5

RGB 77 / 215 / 197

CMYK 64 / 0 / 8 / 16

Coral

#FF715B

RGB 255 / 113 / 91

CMYK 0 / 56 / 64 / 0

Sunshine

#FFC857

RGB 255 / 200 / 87

CMYK 0 / 22 / 66 / 0

Lilac

#C3ADFF

RGB 195 / 173 / 255

CMYK 24 / 32 / 0 / 0

Use 1-2 accent colors in small assets. Larger campaigns may use the full palette.

Keep roughly 70% white, 15% ink, 10% blue and 5% supporting color across everyday brand layouts.
Campaign artwork can be more expressive. Product controls keep their semantic colors.

The logo stays blue/ink or an approved single-color version. Supporting colors belong to the surrounding composition, not a rainbow wordmark.

Brightness with readability built in.

Aa	Aa	Aa	Aa
5.17:1	15.82:1	8.92:1	10.29:1
White on Blue	Ink on White	Ink on Aqua	Ink on Sunshine

Use words with status colors; add symbols where useful.

Confirmed | Payment failed | Needs attention | Information

Use Ink on aqua, coral, sunshine and lilac. White text on those accents fails the normal-text target.
Use Blue for links on white, and a visible underline in body copy. A pale divider is not an input boundary.

Text target: at least 4.5:1; large text: 3:1. Essential UI boundaries/icons: 3:1. Exact sRGB checks are supplied in tokens/contrast-checks.json.

A human voice, set in Manrope.

Aa

Manrope

Regular 400 Medium 500

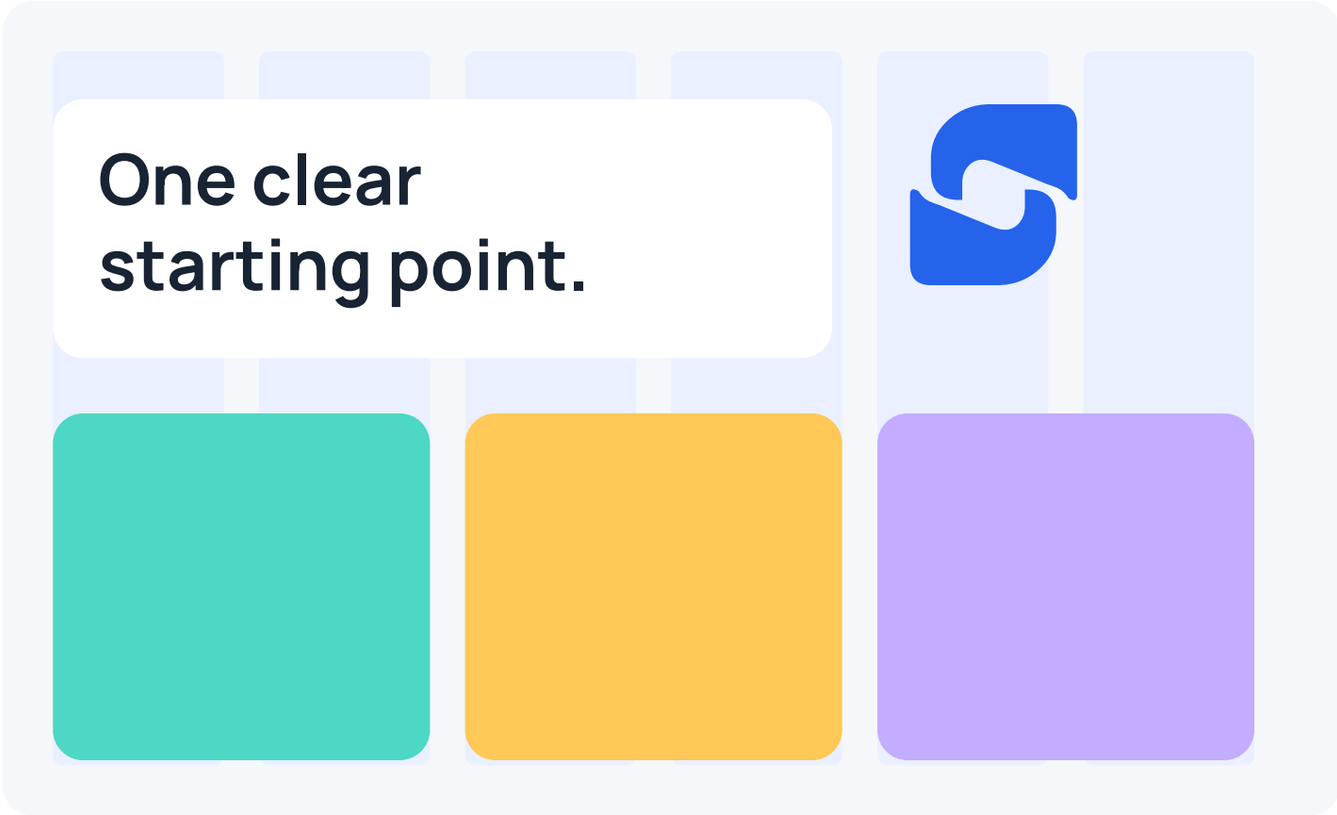

Semibold 600 Bold 700

Logo wordmark: 800, outlined in the master.
Never recreate it with live text.

ROLE	PX / LINE	SAMPLE
Display	64 / 67	Make room
H1	48 / 53	Your space
H2	32 / 38	Bookings
H3	24 / 30	This week
Body	16 / 24	Clear information, right on time.
Small	14 / 21	View your booking
Caption	12 / 18	All times shown in local time

Sentence case. Body tracking 0; headings -0.02em. Aim for 45-75 characters per line. System sans-serif fallback. SIL Open Font License included.

Give people and ideas room.

A simple grid

Use 12 columns on desktop, 4 on mobile. Start with 48 px desktop and 20 px mobile gutters.

Space is functional

Use the 4 px spacing scale. Group related content with 8-16 px; separate sections with 48-96 px.

Softness with structure

8 px controls. 12 px cards. 24 px feature panels. Keep decorative color away from labels and controls.

White space does the organizing. Use rounded forms for emphasis; avoid giving every block a competing color.

Connected shapes. Human energy.

Decorative paths can crop at a layout edge. Use flat colors for the identity; photography provides texture and depth.

Use flowing ribbons

Broad, rounded paths echo the shared passage in the symbol. Give them open ends and confident curves.

Let people lead

Shapes can frame or sit behind people. Keep faces, hands and meaningful activity visible.

Keep the logo exact

Ribbons are a separate graphic device. Preserve the master logo and keep clear space around it.

Put people at the heart of the story.

Real feeling.
Shared possibility.

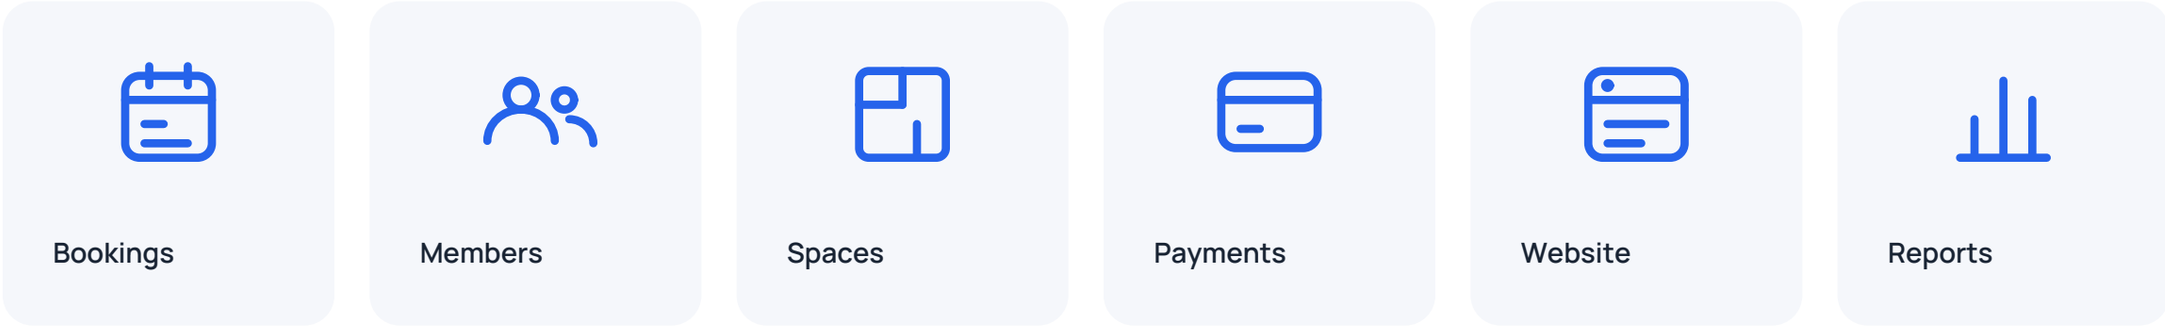

Use natural expressions and believable interactions. Show different people and different kinds of spaces.

For campaigns, combine bright photography with colorful ribbons. For customer stories, use photographs of the actual venue and people.

Choose daylight, clear focal points and useful crop space. Avoid forced poses and decorative stereotypes.

Shown: AI-generated campaign artwork with fictional people. Use permitted, authentic photographs for customer profiles and testimonials.

Small details. Clear signals.

Draw with one voice

24 px grid, 1.75 px stroke, rounded caps and simple open forms. Pair unfamiliar icons with labels.

Move with purpose

120 ms feedback. 180 ms transitions. 240 ms panels. Use a gentle ease-out; remove nonessential motion when requested.

Make control obvious

Use 44 px minimum targets. Visible focus: 2 px ring with 3 px offset. Blue on light; aqua on dark.

These are icon style specimens. An implemented interface should also provide semantic labels, keyboard operation and screen-reader feedback.

Warmth comes from being helpful.

Welcoming

Invite people in.

Clear

Explain the next step.

Capable

Be precise about details.

Optimistic

Show possibility honestly.

SITUATION	WRITE	AVOID

Words that fit more than one craft.

Space	A physical place people can use or book.
Location	A site or address containing one or more spaces.
Resource	Bookable equipment or a capacity-limited item.
Booking	A reservation for a time or activity.
Membership	The offer and its access or participation benefits.
Subscription	The recurring billing arrangement.
Member	A person with an active membership.
Guest	A participant without a membership, where relevant.

Carry the useful ideas forward.

Bookings, memberships, payments, credits, branded pages, stock, team tasks, locations and reporting.

Leave pottery-specific words and workflows behind: pieces, glazing, kilns, firing and clay.

This is a terminology and brand brief, not a code audit. Renaming a pottery workflow does not make the underlying feature generic.

An invitation people understand.

Book a space

Common House · Example venue

Powered by Shario

Customer identity first

Their name, logo, color and photography lead the public experience.

Consistent usability

Retain readable type, clear controls, status meanings and accessible color pairs.

A restrained signature

The optional platform footer stays smaller than the venue identity. Do not recolor a customer logo.

Reassurance at the right moment.

COMMON HOUSE

shario.io

SOCIAL / 1080 × 1080

shario

Make room
for more.

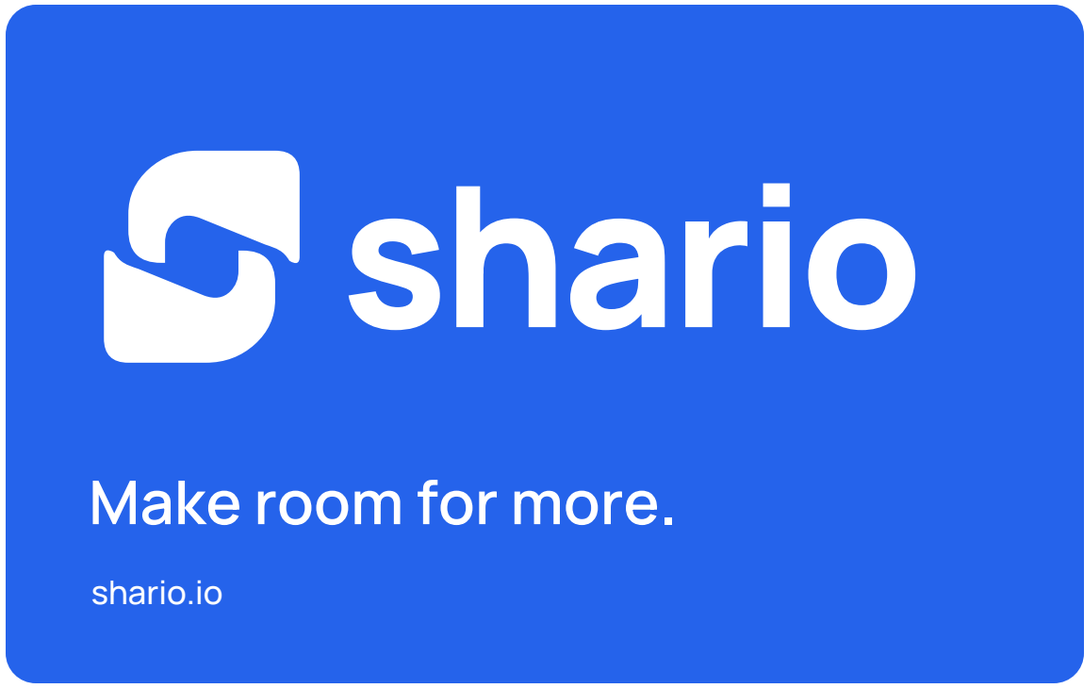

Bookings, memberships and websites
for shared spaces.

LINK PREVIEW / 1200 × 630

One message per image. Keep essential content inside a 6% margin; preview platform crops before publishing.

Recognizable beyond the screen.

shario.io

Signage

Use a flat one-color mark with generous space.

Cards and small formats

Use vector artwork. Add 3 mm bleed when needed. Keep important content at least 4 mm inside trim.

Layouts are illustrative. Set final dimensions, color profile and production tolerances with the printer; no Pantone equivalence is specified.

One source of truth for the identity.

01

Start with the masters

Use outlined SVGs for web and print. Use PNG only where vector artwork is not supported. The logo artwork is independent of installed fonts.

02

Apply semantic tokens

Import the supplied CSS or map the JSON into the new product. Use text, action, border, focus and status roles rather than arbitrary colors.

03

Build Shario independently

Apply this identity in a separate Shario codebase copied from Skab. Audit generic features before retaining them; remove pottery-specific flows and content.

04

Keep customer branding separate

Separate platform tokens from customer theme values. Check contrast after customization and keep semantic status colors consistent.

This delivery contains design assets and guidance. No Skab repository was inspected, copied, changed or migrated as part of the branding work.

Ready for the next step.

IN THE BRAND KIT

logos/

Outlined SVG masters, transparent PNGs, app icons and favicon.
